PROFILE

First-Class Computer Science graduate with a strong interest in AI and machine learning. I am particularly interested in how data can be used to train intelligent systems that recognise patterns, support better decision-making, and solve practical real-world problems. My final year project strengthened this interest by showing me how machine learning can be applied in a meaningful setting, particularly in education and student support.

EDUCATION

De Montfort University

2023 – 2026

BSc (Hons) Computer Science | First Class Honours | **85% overall average**

Leicester, United Kingdom

- Relevant areas: Artificial Intelligence, Machine Learning, Big Data, Software Engineering, Databases, Agile Web Development.

Microsoft Azure Fundamentals Certification

Currently Pursuing

Cloud Computing, Application Deployment and Cloud-Based Development

Online

PROJECTS

Early Intervention Management System | Full-Stack ML Web App | Grade: 95%

2026

- Built a full-stack early intervention system that helps university staff identify struggling students earlier by using machine learning and historical student data to predict whether a student may need support.
- Used XGBoost, FastAPI, PostgreSQL, React/Vite, and TypeScript, with packaged model artifacts, setup scripts, and smoke tests to support repeatable use and verification.

Crypto Sentiment Tracker | Personal Project

- Built a sentiment analysis web application using the Reddit API to collect crypto-related posts and comments, applied VADER sentiment analysis to classify content as positive, neutral, or negative, and connected FastAPI endpoints to a Next.js frontend to display overall market sentiment for selected cryptocurrencies.

Exercise Readiness Fuzzy Logic System | University Project

- Built a MATLAB Mamdani Fuzzy Inference System to recommend workout intensity from wellness inputs, using a 38-rule fuzzy rule base, membership functions, centroid defuzzification, and manual, synthetic, and edge-case testing.

EXPERIENCE

Pizza Express

2023 – Present

Pizzaiolo

United Kingdom

- Working alongside my Computer Science degree helped improve my discipline, resilience, and ability to manage time effectively.
- Built experience in a fast-paced environment where accuracy, communication, teamwork, and quick problem-solving were essential under pressure.

SKILLS

Languages : Python, Java, JavaScript, TypeScript, SQL

AI / Machine Learning : Pandas, NumPy, Data Preprocessing, Feature Engineering

ML Workflow : Predictive Modelling, Model Evaluation

Web / Backend : FastAPI, React, REST APIs, PostgreSQL

Tools / Cloud : Cloud Development, Agile, Git, GitHub
